EDUCATION

Bsc Information Technology, Ls Raheja College of Arts and Commerce
CGPA : 7.30

Mumbai, India

HSC - XII th, Patuck Jr. College of Arts and Commerce
Percentage : 67

Mumbai, India

SKILLS

Languages	HTML, CSS, JavaScript
Databases	MongoDB, MySQL
Tools	Git, GitHub, VS Code, Canva, MS Office
Concepts	Responsive Design, Flexbox
Learning	React.js

PROJECTS

ANNASETU | JavaScript, Bcrypt.js, Node.js, EJS

- Developed a Food Donation Management System to collect surplus food and deliver it to food shelters, effectively minimizing food waste and supporting those in need.
- Connected food donors with food shelters and food banks, enhancing the efficiency of food redistribution and contributing to hunger relief efforts by effectively utilizing surplus food.
- Engineered the system to effectively achieve a 30% improvement in food redistribution through optimization.

SchoolMonitor | React.js, Material UI, Redux, Node.js, Express.js, MongoDB

- Engineered a scalable full-stack school management system with role-based access for administrators, teachers, and students.
- Implemented core modules for attendance tracking, grade management, and real-time communication, improving academic operations.
- Designed responsive, intuitive dashboards and secured user workflows using role-based authentication and access control (RBAC).

WalletTracker | Node.js, Express.js, Chart.js, React, MongoDB, React-Datepicker

- Created WalletTracker, an intuitive and user-friendly expense tracker designed to optimize cash flow management.
- Enabled users to seamlessly add, retrieve, and delete income and expenses, streamlining financial transactions.
- Constructed insightful and effective charts to visualize financial data, enhancing user decision-making.

LEADERSHIP AND EXTRA-CURRICULAR ACTIVITIES

- Demonstrated leadership by actively participating in technical workshops and guiding peers during project-based learning.
- Collaborated with team members to solve coding challenges and improve project outcomes through effective communication.
- Encouraged group participation and supported decision-making in web development and logic-building sessions.

ACHIEVEMENTS AND CERTIFICATIONS

- **Programming Logic Building (C++, Python)** • **Web Development with Bootstrap** • **Ethical Hacking Fundamentals**
